

AAT Fast Track

Commercial Based GPS Vehicle & Asset Tracking Solutions

American Alarm Technology Inc. is pleased to introduce our vehicle and asset tracking solutions program. This program was designed to insure your peace of mind when it comes to safeguarding your employees, vehicles, and assets which are so essential to keeping your business operating at it's highest potential.

In the U.S., there are over 20 million fleet vehicles and 90% of those are not yet equipped with any form of GPS. Studies indicate, however, that over 60% of fleet managers are planning on outfitting their fleet with GPS within the next year.

Whether a company has 5 vehicles or 500, now is the time to implement GPS-based fleet management to improve the productivity and security of any size commercial fleet.

The key features to our AAT Fast Track system are listed below

Key Beacon Features

AAT's beacon solution for fleet management combines functionality with cost effectiveness.

Key features include:

- Compact for easy installation (58mm x 88mm x 22mm)
- Widest available operating temperature range (-15 to 75 C)
- Utilizes GPRS data communication for cost-effective, high volume usage
- Combination external GSM/GPS antenna for easy installation
- Data logging capability (when out of network coverage)
- Multiple I/O

Key System Features

Within the system, there is a robust set of features specifically designed to address the needs of fleet managers:

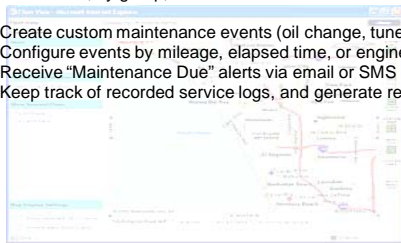

Fleet View
From a single screen, review the status of multiple vehicles at once, including:

- Current location
- Nearest to a particular address
- Nearest to a particular landmark
- "Stops" for the day

Vehicle Maintenance

Keep track of vehicle maintenance by mileage, elapsed time, or engine hours for one vehicle, by group, or for the entire fleet.

- Create custom maintenance events (oil change, tune-up, brake service, etc.)
- Configure events by mileage, elapsed time, or engine hours
- Receive "Maintenance Due" alerts via email or SMS
- Keep track of recorded service logs, and generate reports on demand

AAT Fast Track Beacon Pricing Options

AAT Fast Track GPS Locating Beacon

- \$(Call for Pricing) Unit Only
- \$(Call for Pricing) Unit with Vehicle Installation

Alerts

AAT Fast Track can be set-up to automatically send alerts via email or SMS (text message) for any of the following events:

- Zone entry or departure
- Speed violation
- Auxiliary input trigger
- Maintenance due
- There is always the option of having 24/7 alarm monitoring of events.

Reports

AAT Fast Track can generate a wide range of reports that provide actual information on fleet activities:

- Stop report
- Trip report
- Fleet status
- Landmark summary
- Mileage summary
- Machine hours
- Route log
- State by State mileage
- Vehicle idle time
- Pending maintenance
- Service logs

| Name | Odometer | Engine Hours | Service Status |
|--------------|----------------------|--------------|----------------|
| Van 2 | 10000 km | 500 | Service OK |
| Oil Change | Service on: 5000 km | | Service done |
| Brake Change | Service on: 10000 km | | Service done |
| Van 3 | 10000 km | 150 | Service OK |
| Oil Change | Service on: 5000 km | | Service done |
| Brake Change | Service on: 10000 km | | Service done |
| Van 7 | 10000 km | 100 | Service OK |
| Oil Change | Service on: 5000 km | | Service done |

Report data is available online, for 120 days, and can be exported for use in Excel and other programs.

Key reports can also be scheduled for delivery in Excel, CSV and PDF formats.
